

ER Diagram illustrating the database schema for a fitness application, showing tables, attributes, and relationships.

Tables and Attributes:

- fitness_app.accounts**
 - id (PK, int)
 - first_name (varchar)
 - last_name (varchar)
 - phone (varchar NN)
 - email (varchar NN)
 - password (varchar NN)
 - age (int)
 - weight (float)
 - goal_weight (float)
 - fitness_level (public.fitness_level E)
 - your_goal (public.goal_type E)
 - category_id (FK, int NN)
 - created_at (timestamp)
- fitness_app.categories**
 - id (PK, int)
 - name (varchar NN)
- fitness_app.exercises**
 - id (PK, int)
 - name (varchar NN)
 - description (text)
 - category_id (FK, int NN)
 - duration_minutes (int)
 - reps (int)
 - equipment (varchar)
 - difficulty (public.difficulty_level E)
 - video_url (varchar)
 - created_at (timestamp)
- fitness_app.workout_plans**
 - id (PK, int)
 - name (varchar NN)
 - description (text)
 - category_id (FK, int)
 - created_by (FK, int)
 - duration_weeks (int)
 - difficulty (public.difficulty_level E)
 - created_at (timestamp)
- fitness_app.workout_plan_exercises**
 - id (PK, int)
 - plan_id (FK, int)
 - exercise_id (FK, int)
 - day_of_week (varchar)
 - order_number (int)
 - sets (int)
 - reps (int)
- fitness_app.progress_logs**
 - id (PK, int)
 - user_id (FK, int)
 - date (date)
 - weight (float)
 - body_fat_percentage (float)
 - notes (text)
 - created_at (timestamp)
- fitness_app.meal_plans**
 - id (PK, int)
 - name (varchar)
 - description (text)
 - calories (int)
 - protein (int)
 - carbs (int)
 - fats (int)
 - created_by (FK, int)
- fitness_app.user_meal_logs**
 - id (PK, int)
 - user_id (FK, int)
 - meal_plan_id (FK, int)
 - date (date)
 - notes (text)
- fitness_app.exercise_logs**
 - id (PK, int)
 - user_id (FK, int)
 - exercise_id (FK, int)
 - date (date)
 - sets (int)
 - reps (int)
 - duration_minutes (int)
 - notes (text)
- fitness_app.subscriptions**
 - id (PK, int)
 - user_id (FK, int)
 - plan_name (varchar)
 - start_date (date)
 - end_date (date)
 - is_active (boolean)

Relationships:

- accounts** to **categories**: 1:M (category_id)
- accounts** to **progress_logs**: 1:M (user_id)
- accounts** to **meal_plans**: 1:M (created_by)
- accounts** to **subscriptions**: 1:M (user_id)
- categories** to **exercises**: 1:M (category_id)
- categories** to **workout_plans**: 1:M (category_id)
- exercises** to **workout_plan_exercises**: 1:M (exercise_id)
- workout_plans** to **workout_plan_exercises**: 1:M (plan_id)
- workout_plans** to **subscriptions**: 1:M (plan_name)
- workout_plan_exercises** to **exercise_logs**: 1:M (exercise_id)
- progress_logs** to **meal_logs**: 1:M (meal_plan_id)
- meal_plans** to **meal_logs**: 1:M (meal_plan_id)
- exercise_logs** to **subscriptions**: 1:M (plan_name)
